

Objective answers, without the collection-site lobby.

Testr sends a certified collector to your client's home, in as little as three hours from the order. Professional urine collection, a rapid 14-panel read on site, and optional quantitative confirmation by LC-MS/MS at a CAP-accredited laboratory. Your practice orders in the app; results return to your account with the client's written authorization.

Identity verified at the door: the client's one-time PIN opens the chain of custody.

Order in 60 seconds

Book for a client from your phone, like a ride. Pick their address and a 30-minute arrival window, 7 AM to 7 PM, any day. Track the collector live.

A documented record

Identity verified at the door with a one-time PIN. Sealed specimen, dual signatures, documented chain of custody, and a complete PDF record you can put in the file.

Built for the therapeutic frame

Fifteen quiet minutes at home instead of a public waiting room. Unmarked arrival, no uniforms. The client is treated with dignity; you get the answer.

THE 14-PANEL SCREEN

THC · Cocaine · Opiates · Amphetamine · Methamphetamine · Fentanyl · Benzodiazepines · Barbiturates · Oxycodone · Methadone · Buprenorphine · MDMA · PCP · EtG (alcohol metabolite), plus creatinine, oxidant and pH checks for specimen validity

HOW A VISIT RUNS

1 Order

Your practice books in the app; the client just answers the door.

2 Verify

The collector confirms identity at the door with a one-time PIN.

3 Collect & seal

Temperature-checked collection; tamper-evident seal signed by both parties.

4 Results

Rapid read before the collector leaves; lab confirmation in ~72 hours.

See a sample record first.

We set up your practice account on a 15-minute call and walk through a sample record and a live order.

Scan for the app

Testr never pays referral fees or revenue shares, in line with EKRA (18 U.S.C. §220) and California Business & Professions Code §650. Any recommendation is for the service itself, and that is the whole model.
